

PARTS OF THE BOAT

Glossary

- **Mainsail:** rigged on the main mast of a sailing vessel (the larger sail)
- **Boom:** A horizontal pole that attaches to the mast and is used to extend the foot of the mainsail
- **Mast:** A pole placed vertically on a boat used to support sails
- **Jib:** the sail at the front of a sailboat, hangs in front of the boat's mast
- **Rudder:** A boat's movable underwater steering board, turned by a tiller or steering wheel.
- **Hull:** the portion of your boat that rides both in and on top of the water
- **Stern:** the rear of the boat
- **Bow:** the front of the boat
- **Keel:** A boat's fixed underwater part used to prevent sideways drift and provide stability

A - Starboard

B - Port
